

SMART SENSE

BY DIGI®

Introducing SmartSense VOYAGE

Ensure the security, safety, quality, and compliance of medicines, vaccines, food, expensive fashion products, and other high-cost goods as they move across each touchpoint of the supply chain.

Tackle the Operational Challenges of Modern Supply Chains

With a long list of premiere customers, SmartSense has proven itself as the leading solution provider of condition monitoring, prescriptive workflows, and alerting with corrective actions for fixed refrigeration and freezer assets. SmartSense Voyage is an evolution of the organization's enterprise solution, offering new capabilities for protecting critical assets in motion from route deviation and cargo theft to ensure product availability, medication efficacy, food safety, and revenue maximization.

2024 Best Pharmacy Operations Product

2024 Top Software & Tech award

Protect Your Critical Assets In Motion

OPERATIONS

Increase revenue and strengthen patient throughput by knowing products are on the shelf at high quality when demand is high

SUPPLY CHAIN

Track the location and condition of your fleet between each touchpoint of your supply chains with pin-point accuracy

PRODUCT SAFETY

Protect inventories stored in temporary and overflow locations as if they are in your facilities

INFORMATION TECHNOLOGY

Locate high-value assets when they are removed from your business

LOSS PREVENTION

Reduce product shrink and loss from route deviations and unscheduled stops or door openings

Designed to be Integrated or Stand-Alone

Created with flexibility for the customer in mind, SmartSense Voyage can be seamlessly integrated with your existing SmartSense solution or other enterprise dispatch and management systems for increased visibility and control across your supply chain. As a fully functional solution on its own, SmartSense Voyage brings unique value for operations, supply chain, quality and safety, IT, and loss prevention use cases.

Dimensions:
55.4mm x 86.4mm x 4mm
2.25" x 3.5" x 0.3"

FUELED BY THE FEATURE-PACKED T1 SENSOR

Powerfully small. State-of-the-art design.

- Flexible interval configuration
- Tamper detection
- End-to-end data encryption
- GNSS (GPS) & CELL location services
- Ultra-low-profile form factor
- Temp, light, & impact monitoring
- Store-and-forward
- Global LTE-M cellular communication
- Edge intelligence
- Battery life monitoring
- Status & diagnostic LED
- Buttonless activation technology
