Introducing SmartSense VOYAGE

Ensure the security, safety, quality, and compliance of medicines, vaccines, food, expensive fashion products, and other high-cost goods as they move across each touchpoint of the supply chain.

Tackle the Operational Challenges of Modern Retail

With a long list of premiere customers, SmartSense has proven itself as the leading solution provider of condition monitoring, prescriptive workflows, and alerting with corrective actions for fixed refrigeration and freezer assets. SmartSense Voyage is an evolution of the organization's enterprise solution, offering new capabilities for protecting critical assets in motion from route deviation and freight theft to ensure product availability and revenue maximization.

Protect Your Critical Assets In Motion

$ OPERATIONS
Increase revenue by knowing products are on the shelf at high quality when demand is high

SUPPLY CHAIN
Track the location and condition of your fleet between your distribution centers and stores with pin-point accuracy

FOOD SAFETY
Protect temporary overflow inventories as if they are in your facilities

INFORMATION TECHNOLOGY
Locate high-value assets when they are removed from your business

LOSS PREVENTION
Reduce product shrink from route deviations and unscheduled stops or door openings

Designed to be Integrated or Stand-Alone

Created with flexibility for the customer in mind, SmartSense Voyage can be seamlessly integrated with your existing SmartSense solution or other enterprise dispatch and management systems for increased visibility and control across your supply chain. As a fully functional solution on its own, SmartSense Voyage brings unique value for operations, supply chain, food safety, IT, and loss prevention use cases.
